SKILLS

- Languages: JavaScript, HTML, CSS, Python
- Libraries and Frameworks: React, Node, Express, Django, jQuery, Bootstrap, Mongoose, Material UI

EXPERIENCE

Software Engineering Fellow | General Assembly

(09/2021) – (12/2021)

- Developed responsive and dynamic web applications using JavaScript, HTML, CSS, and React to improve user experience and implement easy to navigate designs.
- Collaborated with teams using Git and GitHub resulting in an agile and streamlined development workflow.
- Demonstrated programming and best software engineering practices by following “DRY” coding protocol to decrease loading times for larger highly-scalable projects.

Accountant | Highridge Costa Investors

(12/2017) – (08/2021)

- Implemented a cloud-based accounting review process decreasing work time by over 50%.
- Communicated with management companies, auditors, and other outside entities to answer questions and ensure audits are finalized on time.
- Resolved journal entry discrepancies and budgets with various departmental team to ensure corrections are processed accurately and budgets are reviewed timely.

Trade Show Coordinator | Asmodus Distributions.

(07/2015) – (05/2017)

- Developed functional email templates in Mail Chip designed around a mobile-friendly user experience.
- Created designs on Adobe Photoshop and successfully implemented email campaigns to ensure all campaigns were delivered on strategy and executed flawlessly.
- Collaborated closely with management and organizers to understand priorities and event requirements.

PROJECTS

- **Travelgram:** A full-stack web application that will allow people to share their travel experience to a community of other travelers. Created with React and Material UI for frontend, Express and MongoDB for backend.
- **Studio Ghibli Database:** A web application to search and view additional details for Studio Ghibli films. Created with React and Material UI.
- **QuizJS:** A full-stack quiz application to test your knowledge in Javascript, React, and HTML/CSS. Created with React and Material UI for frontend and Firebase for backend.
